

## COX SCIENCE PLAZA RENOVATION - PHASE II

**Square Footage:** 20,000 SF

**Architect:** Perkins+Will

**Contractor:** Arellano Construction

**Project Program:**

The new plaza creates a more user friendly outdoor plaza featured on the south side of the Cox Science Building to enhance existing landscaping creating shaded spaces as well as sunlit areas. It creates the opportunity for large student and community gathering with more social spaces outside of the building. It promotes informal and building learning communities with shared spaces and collaboration zones. Also has a more gradual elevation change outside for accessibility ramps to the building.
